

KC-10 Contractor Logistics Support

Northrop Grumman Technical Services is considered a powerhouse in logistics support, sustainment and technical services for the corporation as well as current and future customers. The sector's Life Cycle Optimization and Engineering (LCOE) group provides a full spectrum of contractor logistics support to include logistics management, depot maintenance, sustaining engineering support and global field management. The sector also has tremendous reach-back to the broader Northrop Grumman enterprise. The Northrop Grumman KC-10 team is committed to innovation and continuous improvement with the goal of improved, more affordable warfighter readiness. We excel in program integration, leveraging the best of individual partner core competencies while ensuring the unity of management and unity of effort to provide a single force for total Contract Logistics Support (CLS).

NORTHROP GRUMMAN

Northrop Grumman Corporation is a leading global security company whose 120,000 employees provide innovative systems, products and solutions in aerospace, electronics, information systems, shipbuilding and technical services to government and commercial customers worldwide.

Dual-depot strategy

By providing the Air Force with a dual-depot capability at our Lake Charles, La., facility and teammate TIMCO's facility in Greensboro, N.C., we've set the stage for internal competition, market-based pricing assurance and lower risk due to elimination of single-point failures as a result of external conditions. Undoubtedly, our near round-the-clock dual-depot operations enable timely workflow with more time on aircraft and quicker returns to the fleet.

MyKC10™

MyKC10™ is an innovative, web-based enterprise operating system designed to leverage network-centric operations in support of our global mission. The program was designed with the customer in mind and has a "customer button" that provides the Air Force desktop access to key program management data in support of our cost, schedule and performance requirements.

World-class teammates

The Air Force and our nation's warfighters deserve nothing short of the best, and that's why we put together a best-in-breed team for KC-10 CLS.

AAR Corp. is the supply management solution for KC-10 CLS. As a leading aviation support company, AAR provides their varied customers with just-in-time delivery, parts exchange and Parts Manufacture Authoring (PMA).

Chromalloy Gas Turbine LLC and MTU Maintenance will provide engine maintenance and management solutions for the Northrop Grumman team. Chromalloy's after market approach leverages FAA-approved, Designated Engineering Representative repairs and PMA parts to maximize savings. Chromalloy is a global provider of turbine engine parts and repairs for airline, military and industrial customers. MTU Maintenance is the single largest CF6-50 engine overhaul provider in the world.

TIMCO Aviation Services Inc. is the largest single independent provider of fully integrated aviation maintenance, repair and overhaul services for major commercial and government aircraft operators in North America, supporting its customers with comprehensive, individually tailored aircraft care services. TIMCO has extensive experience maintaining, repairing and modifying DC-10-type aircraft, servicing customers like FedEx, Northwest Airlines and United Airlines.

Technical Services, a sector of Northrop Grumman, has more than 19,500 employees and annual revenues of more than \$2 billion. With nearly 50 years of experience supporting all phases of process and system integration, Technical Services helps organizations manage their increasingly complex requirements.
