

# Linguist Programs

Northrop Grumman Technical Services' Linguist Programs (LP) provides expert linguist and translator services for military operational and training requirements worldwide. Today's operations are conducted in a dynamic environment of ever-changing issues, events and needs. Deployed forces and government organizations depend on effective communication to act quickly and efficiently across cultural and multinational barriers.

The professional linguists that LP brings to today's global enterprises offer tremendous talent and services to fulfill the military's growing need. With 20 years of linguistic service experience, LP continues to develop a depth of capabilities, experience and expertise unique in the linguist services industry.

***NORTHROP GRUMMAN***

Northrop Grumman is a leading global security company providing innovative systems, products and solutions in aerospace, electronics, information systems, and technical services to government and commercial customers worldwide.

## Partners in Performance

Technical Services' LP team supplies contract linguists and management support from the smallest and shortest of training exercises to full-scale power projection contingency operations. The program is currently performing its 10th linguist contingency services program since it began providing contract linguist support for Operation Desert Storm in 1990.

Northrop Grumman has recruited and deployed more than 10,000 linguists in 18 countries and 10 contingency operations, as well as 1,500 linguists for 10 major mission rehearsal exercises. Delivering quality linguist services with speed and efficiency is of primary importance for each exercise and operation.

Linguist Programs meets all constraints imposed in a timely and professional manner. No two missions are the same. Some operations require expedited deployments, Immigration and Naturalization Service consultation, medical documentation verification, various clearance levels, or specific payroll insurance system implementations.

## Global Resources

LP harnesses the broad reach-back of the Northrop Grumman enterprise and is able to respond quickly to changes in the number of linguists a customer requires. With Northrop Grumman's worldwide presence, LP can rapidly establish operations in support of crisis and contingency operations. Northrop Grumman meets linguist requirements around the world and provides the resources and experience to find, screen, deploy, manage in-theater and redeploy linguists for any requirement.

Delivering advanced technology and services to address today's critical problems since 1939, government and commercial customers look to Northrop Grumman for solutions to their most pressing challenges. Northrop Grumman's Linguist Programs are based at its deployment operations center in Fairfax, Va.
